Project History & Tracker

Significant projects remembered from our work together, arranged from oldest to newest. Small one-off questions are excluded; related tasks are grouped under their main project.

#	Project	Started	Status
1	Quote Challenge App	Late August / early September 2026 (approx.)	ACTIVE
2	Google / Gmail Security and Account Maintenance	August 29, 2026	ONGOING
3	Ohio Housing / Section 8 Search	September 10, 2026	ACTIVE - SLOW MOVING
4	Franny Pick 3 Analysis	September 11-12, 2026	ON HOLD / DELIVERED
5	Family and Friends Photo Archive / People Index	September 19, 2026	IN PROGRESS
6	Security, Account Recovery, and the Cost to the User	September 22, 2026	COMPLETED / SHAREABLE
7	Photo Organizer App Concept	September 23, 2026	SPECIFICATION / PLANNING

Note: Dates marked approximate reflect the earliest reliable point I can place the project from our history.

1. Quote Challenge App

Started	Late August / early September 2026 (approx.)	Status	ACTIVE

Purpose: Build a one- or two-player movie and TV quote guessing game that can become a real installable app.

Milestones:

- V1 demo created, followed by playable V2 and V3/V3.1 work.
- Core scoring rules defined: show/movie, speaker, before/after bonus, defensive 'I have it,' and opening 25-point quote.
- Editable quote library and local storage added; roughly 25-30 quotes were ready during early testing.
- Goal established to grow the library to about 150 quotes before Beta 1.
- GitHub/README work resumed; repository wording and cosmetic cleanup are part of the current pass.

Next checkpoint: Keep building the quote database, tighten GitHub presentation, and continue toward dependable two-phone play.

Notes:

2. Google / Gmail Security and Account Maintenance

Started	August 29, 2026	Status	ONGOING

Purpose: Track account-security changes and keep recovery, passwords, passkeys, exports, and connected-app access organized.

Milestones:

- Security activity log compiled across password, recovery-contact, passkey, archive, and access changes.
- Authenticator and multiple passkeys added; password-manager transfer between Galaxy and Moto completed.
- Google archive exports requested and reviewed.
- Weekly account-access maintenance review established as an ongoing routine.

Next checkpoint: Continue the weekly review and keep the main Moto account state, backups, and passkeys consistent.

Notes:

3. Ohio Housing / Section 8 Search

Started	September 10, 2026	**Status**	**ACTIVE - SLOW MOVING**

Purpose: Find an affordable Ohio studio or one-bedroom home that works with housing assistance and allows Freddy, ideally with a small grass area.

Milestones:

- Multiple properties visited and compared.

- Pike County housing and Community Action resources contacted.

- CAC landlord lists received and calling process started.

- Section 8 paperwork filed; search broadened as needed.

Next checkpoint: Keep following callbacks, suitable landlord leads, and housing-assistance options without rushing into a poor fit.

Notes:

4. Franny Pick 3 Analysis

Started	September 11-12, 2026	**Status**	**ON HOLD / DELIVERED**

Purpose: Turn Franny's handwritten Ohio Pick 3 work and archive results into a usable analysis and tracking system.

Milestones:

- Large historical result set reviewed and patterns summarized.

- A 14-page printed report was delivered: 10 pages of analysis plus 4 tracking worksheets.

- Franny received a printed copy for review.

- A larger master report was intentionally put on hold to avoid making the system more confusing.

Next checkpoint: Resume only if Franny asks for more analysis or brings new results to add.

Notes:

5. Family and Friends Photo Archive / People Index

Started	September 19, 2026	Status	IN PROGRESS

Purpose: Organize family, friends, pets, memorial photos, and identity references into a usable visual archive.

Milestones:

- People/photo mappings and family relationships collected into an index.

- Janine family-memory image created and sent.

- Jimmy reference photos and long-time friendship context added.

- Tackett family list reconstructed from memory.

- Circle portraits and grouped family/friends layouts started.

Next checkpoint: Keep adding confirmed photos and names, then assemble the strongest grouped layouts and reference sheets.

Notes:

6. Security, Account Recovery, and the Cost to the User

Started	September 22, 2026	Status	COMPLETED / SHAREABLE

Purpose: Document the problems that occur when strong security systems leave the real owner without a practical recovery path.

Milestones:

- Six-page revised PDF completed and visually checked.

- Facebook, Google/Gmail, and GitHub Pages/look-alike-domain experiences used as examples.

- Human escalation, evidence standards, offline recovery ideas, and ownership-without-recourse concerns organized into a structured argument.

- A shorter one-page handout version was also prepared.

Next checkpoint: Keep as a finished reference; revise only if new evidence or a new audience requires it.

Notes:

7. Photo Organizer App Concept

Started	September 23, 2026	Status	SPECIFICATION / PLANNING

Purpose: Design a cross-platform photo-organizing app for Android, iPhone/iPad, and Windows.

Milestones:

- Core requirements defined: import local photos, sort by dates and sizes, recognize people/pets, handle duplicates, and optionally use internet matching.

- A detailed build prompt/specification was drafted.

- Workflow idea established: use high-volume specialty tools for repetitive photo work and reserve deeper review for organization, selection, and layout.

Next checkpoint: Turn the specification into a prototype when this project moves from planning into development.

Notes:

Current Priority Snapshot

Project	Current state
Quote Challenge	Active again - app, GitHub, quote library, and multiplayer path
Google/Gmail Security	Ongoing weekly maintenance
Housing Search	Active, but dependent on suitable leads and callbacks
Franny Pick 3	On hold unless Franny requests more work
Photo Archive	In progress
Security Recovery Argument	Finished and shareable
Photo Organizer App	Specification complete enough to begin prototyping later
